<b>Rationale</b>	The main aim of this syllabus is to provide an opportunity for the learners to use English for different situations. Every chapter of the syllabus is based on reading text and a range of tasks and activities, designed to enable the learners to practice the different skills, sometimes individually and sometimes in pairs or groups. This syllabus is allowing grammar to be used in a more meaningful role in learning language. Thus, the students develop their language skills by practicing language activities and not merely knowing the rules of the language.
<b>Learning Outcomes</b>	<p><b>After the completion of the course, learners will be able to:</b></p> <ul style="list-style-type: none"> <li>• Develop Reading, Writing, Listening &amp; Speaking Skills</li> <li>• Develop creative writing</li> <li>• Acquire grammatical accuracy</li> <li>• Communicate effectively</li> </ul>

<b>Rationale</b>	<p>Printing technology has great demand in every sphere of our life. Whatever we use in our daily life there must have some connections with printing. There are many types of printing technologies such as Offset printing, Gravure printing, Letterpress printing, Screen printing, Digital printing. The student studying in printing technology must have some basic knowledge about all types of printing process. Printing basics is the prerequisite to be familiar with printing technology. The subject will enable the diploma engineers to acquire knowledge on Gradual development of Printing, to understand the fundamental difference of printing process, to understand the basic concepts of Modern made ready techniques, understand the operation system of different Printing Machineries and to understand printing ink and media of Printing.</p>
<b>Learning Outcome (Theoretical)</b>	<p><b>After undergoing the subject, students will be able to:</b></p> <ul style="list-style-type: none"> <li>▪ Describe gradual development of printing.</li> <li>▪ Explain various types of printing process.</li> <li>▪ Explain the photographic process.</li> <li>▪ Explain different types of printing image carrier.</li> <li>▪ Describe printing ink.</li> <li>▪ Describe printing stock/paper.</li> <li>▪ Explain proof reading and its marks.</li> </ul>
